

NGUYEN THANH VU

Fresher Full-Stack Developer

+84374797826 | nthanhvu1411@gmail.com | github.com/nguyenthanhvu1411

PROFILE

Full-Stack Developer with strong knowledge of C#, ASP.NET Core, JavaScript, ReactJS, and Object-Oriented Programming (OOP). Skilled in developing RESTful APIs, designing scalable web applications, and building responsive user interfaces.

EDUCATION

Ho Chi Minh City Industry and Trade College

Information Technology | 2023 - 2026

GPA: 7.3/10

SKILLS

Backend: C#, ASP.NET Core, RESTful API, JWT Authentication, OOP, Java Spring Boot.

Frontend: ReactJS, NextJS, Tailwind CSS, JavaScript, TypeScript.

Database: SQL Server, MySQL.

Tool: Git, Docker (basic), AI Agent.

Soft Skills: Problem Solving, Team Collaboration, Communication, Fast Learning, Self-learning.

WORK EXPERIENCE

Fullstack Developer – Personal Projects *Jan 2024 – Present*

- Developed responsive web applications using ReactJS and NextJS.
- Developed RESTful APIs using ASP.NET Core and Entity Framework Core, enabling integration with external systems and improving data processing efficiency.
- Integrated SQL Server databases with backend services.
- Tested and documented APIs using Postman.
- Utilized Git and GitHub to effectively manage and maintain source code repositories.
- Applied Clean Architecture principles to improve maintainability.

PROJECTS

Warehouse Management System *May 2026 – Jul 2026*

Developed Warehouse Management System (WMS) for inbound, outbound, inventory, and warehouse operations.

- Designed and developed 30+ RESTful APIs.
- Built full-stack WMS modules using ASP.NET Core and ReactJS.
- Implemented inventory management and stock allocation features.
- Developed authentication, authorization, and audit logging.
- Optimized SQL Server queries and application performance.

Tech: ASP.NET Core, Entity Framework Core, SQL Server, ReactJS, TypeScript, TailwindCSS, JWT Authentication, Clean Architecture

E-Commerce Microservice System *Jan 2026 – Apr 2026*

Developed an e-commerce platform based on microservices architecture, supporting features such as product management, shopping cart, order processing, and online payment via VNPAY.

- Designed an E-commerce platform using Microservices Architecture.
- Developed Cart, Order, Payment, Shipping services.
- Implemented JWT Authentication and API Gateway.
- Integrated VNPay payment gateway and refund processing.
- Tested and documented APIs using Postman.

Tech: Java Spring Boot, API Gateway, Eureka, MySQL
